

Dreamworx Ink Ltd. Waiver, Release and Consent to Tattoo form

In consideration of receiving a tattoo from any Tattooist at Dreamworx Ink Ltd. together with its employees, apprentices and agents, I agree to the following:

- 1) That I, _____ (clearly PRINT your name) have been fully informed of the inherent risks, associated with getting a tattoo. I fully understand that these risks, both known and un-known, can lead to injury, including but not limited to infection, scarring, difficulties in detecting melanoma and allergic reactions to tattoo pigment, latex gloves, and/or soap. Having been informed of the potential risks associated with getting a tattoo, I still wish to proceed with the tattoo application and I freely accept and expressly assume any and all risks that may arise from tattooing.
- 2) TO WAIVE and RELEASE to the fullest extent permitted by law each of the Artists and the Tattoo Studio from all liability whatsoever, for any and all claims or causes of action that I, my estate, heirs, executors or assigns may have for personal injury or otherwise, including any direct and/or consequential damages, which result or arise from the application of my tattoo, whether caused by the negligence or fault of either the Artist or the Tattoo Studio, or otherwise.
- 3) That both the Artist and the Tattoo Studio have given me the full opportunity to ask any and all questions about the application of my tattoo and all of my questions have been answered to my total satisfaction.
- 4) The Artist and the Tattoo Studio have given me instructions on the care of my tattoo while it's healing, and I understand them and will follow them. I acknowledge that it is possible that the tattoo can become infected, particularly if I do not follow the instructions given to me. If any touch-up work to the tattoo is needed due to my own negligence, I agree that the work will be done at my own expense.
- 5) I am not under the influence of alcohol or drugs, and I am voluntarily and willingly submitting myself to be tattooed by my appointed Artist without duress or coercion.
- 6) Neither the Artist nor the Tattoo Studio is responsible for the meaning or spelling of the symbol or text that I have provided to them or chosen from the flash (design) sheets.
- 7) I do not have diabetes, epilepsy, hemophilia, a heart condition, nor do I take blood thinning medication. I do not have any other medical or skin condition that may interfere with the application or healing of the tattoo. I am not the recipient of an organ or bone marrow transplant or, if I am, I have taken the prescribed preventive regiment of antibiotics that is required by my doctor in advance of any invasive procedure such as tattooing or piercing. I am not pregnant or nursing. I do not have a mental impairment that may affect my judgment in getting the tattoo.
- 8) Variations in color and design may exist between the tattoo art I have selected and the actual tattoo when it is applied to my body. I also understand that over time, the colors and the clarity of my tattoo will fade due to unprotected exposure to the sun and the naturally occurring dispersion of pigment under the skin.
- 9) I release all rights to any photographs taken of me and the tattoo and give consent in advance to their reproduction in print, digital or electronic form.
- 10) A tattoo is a permanent change to my appearance and can only be removed by laser or surgical means, which can be disfiguring and/or costly and which in all likelihood will not result in the restoration of my skin to its exact appearance before being tattooed.
- 12) I agree to reimburse each of the Artist and the Tattoo Studio for any attorneys' fees and costs incurred in any legal action I bring against either the Artist or the Tattoo Studio and in which either the Artist or the Tattoo Studio is the prevailing party.
- 13) I acknowledge that I have been given adequate opportunity to read and understand this document, that it was not presented to me at the last minute, and I understand that I am signing a legal contract waiving certain rights to recover against the Artist and the Tattoo Studio. If any provision, section, subsection, clause or phrase of this release is found to be unenforceable or invalid, that portion shall be severed from this contract. The remainder of this contract will then be construed as though the unenforceable portion had never been contained in these documents. I hereby declare that I am of legal age (and have provided valid proof of age) and am competent to sign this Agreement or, if not, that my parent or legal guardian shall sign on my behalf, and that my parent or legal guardian is in complete understanding and concurrence with this agreement.

I HAVE READ THIS AGREEMENT, I UNDERSTAND IT AND AGREE TO BE BOUND BY IT.

Dreamworx Ink Ltd. Waiver, Release and consent to Piercing form

In consideration of receiving a body piercing from any Piercing Artist at Dreamworx Ink Ltd. together with its employees, apprentices and agents, I agree to the following:

- 1) That I, _____ (clearly PRINT your name) have been fully informed of the inherent risks, associated with getting a piercing. I fully understand that these risks, both known and un-known, can lead to injury, including but not limited to infection, scarring or keloids, allergic reactions to jewelry, latex gloves, and/or soap. Having been informed of the potential risks associated with getting a piercing, I still wish to proceed with the piercing and I freely accept and expressly assume any and all risks that may arise from piercing.
- 2) TO WAIVE and RELEASE to the fullest extent permitted by law each of the Artists and the Piercing Studio from all liability whatsoever, for any and all claims or causes of action that I, my estate, heirs, executors or assigns may have for personal injury or otherwise, including any direct and/or consequential damages, which result or arise from the piercing, whether caused by the negligence or fault of either the Artist or the Piercing Studio, or otherwise.
- 3) That both the Artist and the Piercing Studio have given me the full opportunity to ask any and all questions about the piercing procedure and the staff has answered these questions to my total satisfaction.
- 4) I affirm that both the Artist and the Piercing Studio have given me instructions on the care of my piercing while it's healing, and I understand them and will follow them. I acknowledge that it is possible that the piercing can become infected, particularly if I do not follow the instructions given to me.
- 5) I affirm that I am not under the influence of alcohol or drugs, and I am voluntarily and willingly getting a piercing without duress.
- 6) I affirm that I do not have diabetes, epilepsy, hemophilia, nor do I have a heart condition or take blood thinning medication. I do not have any other medical or skin condition that may interfere with the procedure or healing of the piercing. I am not the recipient of an organ or bone marrow transplant or, if I am, I have taken the prescribed preventive regiment of antibiotics that is required by my doctor in advance of any invasive procedure such as piercing. I am not pregnant or nursing.
- 7) I acknowledge that the piercing will result in a permanent change to my appearance and that my skin may not be restored to its pre-piercing condition even after its removal.
- 8) I release all rights to any photographs taken of me and the piercing and give consent in advance to their reproduction in print, digital or electronic form
- 9) I agree to reimburse each of the Artist and the Piercing Studio for any attorneys' fees and costs incurred in any legal action I bring against either the Artist or the Piercing Studio and in which either the Artist or the Piercing Studio is the prevailing party.
- 10) I acknowledge that I have been given adequate opportunity to read and understand this document, that it was not presented to me at the last minute, and I understand that I am signing a legal contract waiving certain rights to recover against the Artist and the Piercing Studio. If any provision, section, subsection, clause or phrase of this release is found to be unenforceable or invalid, that portion shall be severed from this contract. The remainder of this contract will then be construed as though the unenforceable portion had never been contained in these documents. I hereby declare that I am of legal age (and have provided valid proof of age) and am competent to sign this Agreement or, if not, that my parent or legal guardian shall sign on my behalf, and that my parent or legal guardian is in complete understanding and concurrence with this agreement.

Dreamworx Ink Ltd. Tattoo aftercare Instructions

Now, you have your fresh new tattoo, and you want to take good care of it! From this point on, we are not responsible for any infection or problems you may have with your tattoo if you don't take proper care of it. It is very important that you follow these guidelines. A really beautiful tattoo can turn into a disaster if the proper aftercare is not taken.

Leave That Bandage Alone

Your artist took the care to cover up your new tattoo for a very good reason - to keep air-born bacteria from invading your wound. Yes, as pretty as your new tattoo is, it is still a wound. Open flesh is a breeding ground for bacteria and infection. Leave the bandage on for a *minimum* of two hours. Excitement of having a new tattoo will make you want to remove the bandage so you can show your friends, but your friends will just have to wait until later.

Wash and Treat

After you remove the bandage, you will want to wash your tattoo. Use lukewarm water and mild, liquid antibacterial or antimicrobial soap to gently wash away any ointment, blood and/or plasma and to completely clean the area. Do not use a washcloth or anything abrasive. Your hand is your best tool in this case. If your tattoo feels slimy and slippery, you have probably been oozing plasma. Try to gently remove as much of this as possible, when the plasma dries on the skin surface it creates scabs. Then pat (do not rub) the area firmly with a CLEAN towel or paper towel to get it completely dry. Follow with a very light application of your choice of ointment. Vitamin A&D enriched ointment would be our first choice, but if you don't have any, Bacitracin or a similar antibacterial ointment is acceptable. Do not use Neosporin. This is a wonderful product for cuts and scrapes, but not for tattoos. Some can have an allergic reaction to the Neosporin, which causes little red bumps. When the bumps go away, so does the ink, and you end up with a polka-dotted tattoo.

Specialty Products and Lotions

If you prefer, you can also use a specialty product such as Tattoo Goo. Use these products as directed and repeat for 3-5 days. After that, continue to keep it clean, but you can use lotion when needed instead of ointment, to keep the skin soft. Whatever lotion you use, it should be dye and fragrance free. We recommend Lubriderm or Eucerin.

Bathing, Showering, Hot Tubs, and Swimming

Yes, you can (and should!) shower with a new tattoo. It's OK to get your tattoo wet - just don't soak it. Submerging your tattoo in a bath or hot tub can cause serious damage, so you'll want to avoid these for 2-3 weeks, but showering is perfectly fine as long as you don't saturate your tattoo. If you get soap or shampoo on your tattoo, just remove it quickly with water. Swimming, whether it be in a pool, lake, pond, river or ocean, fresh water or salt water, should be avoided for at least 2 weeks.

Scabbing and Peeling

After a few days, you will notice some peeling and possibly a little scabbing. Apply warm moist compresses to the scabs for about 5 minutes 2-3 times a day to soften them and they will eventually come off on their own. Do not apply ointment or lotion to a softened scab - wait for it to dry. You will also start to itch, just like with a sunburn when it begins to heal, the advice here is, don't pick, and don't scratch! If the skin itches, slap it. If it is peeling, put lotion on it. And if it is scabbing, just leave it alone. Your tattoo is almost healed, and now is not the time to ruin it!

Protection from the sun

After your tattoo is healed, from now on, you will always want to protect it from the sun's ultraviolet rays that can fade and damage a brilliant tattoo very fast. Before spending a lot of time in excessive heat, protect your tattoo with a minimum 30 SPF sunblock. This will keep your tattoo vibrant for many years, and it will continue to be a source of great pride.

Dreamworx Ink Ltd. Piercing aftercare Instructions

Everything you need to know about your new piercing is on this care sheet. It is very important that you read it carefully, and please keep it for future reference. If you are tempted to deviate from these instructions, in any way, please call us first.

How to care for your body piercing

1. Handle your piercing **ONLY** after washing your hands, and **ONLY** when it is being cleaned.
2. Be sure to follow the cleaning directions outlined in the information below.
3. Overcleaning can slow healing and cause irritation. Overcleaning is just as bad as undercleaning. The recommended cleansing techniques maintain a constant balance.
4. Use **ONLY** the recommended cleaning agents.
5. The following products will irritate the new tissue, delay healing and **SHOULD BE AVOIDED**: Antibacterial soap, Bactine, Tea Tree, Witch Hazel, Ear cleaning solution, Peroxide, Alcohol, Antibiotic ointments. Soaps, shampoos and conditioners that contain deodorant, are overly strong, are highly scented, are colored or are over-moisturizing should also be avoided.
6. Wear jewelry constantly during the healing and toughening periods. Jewelry that is inappropriate in material, design or size can cause irritation and allergy. Consult with your piercer regarding jewelry that is right for you.
7. Heavy use of a piercing (i.e. play, pendants) before it is thoroughly healed, can lead to infection and early migration.
8. Avoid oral contact until your piercing is completely healed (no evident seeping).
9. Piercings in cartilage take longer to heal and must be cleaned for the entire healing period.

Miscellaneous tips

We don't know how long it will take for your piercing to heal - in a short time you will be the best judge of that. Expect new piercings to be sore and red for about a month - if there isn't a marked improvement after that time, contact your piercer to help you determine a route to speedier healing. Continue to clean your piercing once a day for as long as you have it.

Cleansing Techniques

Navel/ Nipple/ Ear Lobe/ Septum/ Nostril/ Brow

1. Always wash your hands before handling your piercing.
2. Mix 1/4 teaspoon salt with 250 ml very warm water. Soak the piercing until the salt water has cooled down (about 10 mins). Do this twice a day until your piercing is healed. (Caution: Over heating water will cause burns).
3. Using Q-tips, gently clean any remaining lymph (crusties) away from the piercing.
4. Avoid moving the jewelry back and forth through the piercing - it does more harm than good.
5. It is always ok to gently clean the outside of a piercing with saline* and a clean Q-tip. Do this when activity may cause the ring to turn (exercise, etc.) or when it feels "sticky" or uncomfortable. *Use saline solution for contact lenses only. No other contact lens solution is recommended.

Lip/ Labret/ Tongue/ Frenulum/ Monroe

Outside of the Piercing: Use the prescribed cleansing techniques as listed above (numbers 1-5).

Inside the Mouth: For the first 3 weeks rinse with salt water or diluted alcohol-free mouthwash for 10 seconds after you place anything in your mouth other than water - this includes cigarettes. (Salt water: 1/2 tsp. sea salt per 1 cup of water). (Mouthwash: 1/4 cup to 3/4 cup of water).

Note Regarding Tongue Piercing: For protection of teeth, downsizing your barbell is strongly recommended. Playing with the piercing while healing causes excessive swelling and increases pain.

Genital Piercings

All piercings are an open channel to the blood stream. Especially in the case of genital piercings, sexual contact during the healing phase could be dangerous to you or your partner. Exercise safe sex protocol and don your barrier of choice. Go easy on your new piercings - they will heal much faster if you play nice. Surprisingly to some, your urine may be your best ally when healing a piercing. It is sterile for your body and the best possible rinsing agent you have (barring, of course, any urinary tract infections).

Female Piercings: Female genital piercings typically heal fast and easy. Rinse the outside of the piercing and clean the jewelry a few times a day with your own urine, or clean water.

Male Piercings: Follow the general cleansing techniques for cleaning your piercing. Abstain from sex as long as possible, or for 4 weeks - whichever comes first. On piercings through the head or the urethra, expect bleeding for a few days. If bleeding continues after that time, or if there is an unexpectedly large amount of bleeding, contact your piercer. Do not seek sympathy for your bleeding member from women - they will laugh at you.

Stretching

Freshly stretched piercings often require cleaning, which may be done with a mild antibacterial soap. Create a lather, but **DO NOT** force the jewelry through the piercing until it moves freely. The piercing may need time to relax before being irritated from back & forth movement. Be sure to wash away all soap residue. A waiting period of 6 months after your piercing has healed is recommended before you start stretching it. See your piercer to insert larger gauge jewelry into your piercing.

Allergy Symptoms

Symptoms of Allergy: Itchiness, Redness, Seeping Clear Fluid

If these symptoms occur, **KEEP THE JEWELRY IN YOUR PIERCING**. Consult your piercer at once. You may need to change your cleaning solution or your jewelry.

Infection Symptoms

Occasionally bacteria will enter the piercing even though the cleaning has been done meticulously. If this should happen, an infection may result.

Symptoms of Infection: Swelling, Redness, Area Hot to Touch, Pus Discharge (Green), Pain

If these symptoms occur, **KEEP THE JEWELRY IN YOUR PIERCING**. Contact your body piercer at once. If required, your piercer will refer you to your doctor.

Migration and/or Rejection

If the piercing is becoming shallow or irritated contact your piercer immediately in order to avoid excessive scarring.
